

Yunkai Wang

SOFTWARE DEVELOPER · SOFTWARE ENGINEER

Ottawa, ON

+1 (613) 890-6018 | yunkaiwang1996@gmail.com | [yunkaiwang](https://github.com/yunkaiwang) | [yunkaiwang](https://www.linkedin.com/in/yunkaiwang)

Education

Carleton University

M.C.S. COMPUTER SCIENCE

Ottawa, ON

Jan. 2020 - Current

- Research in Computational Geometry. GPA: 11.4/12. Expected June 2021.
- **Courses:** Statistical and Syntactic Pattern Recognition, AI-enabled Software Verification and Testing, Algorithms for Data Science.

B.C.S. COMPUTER SCIENCE

Sep. 2014 - Jun. 2019

- Algorithms Stream with Minor in Mathematics. GPA: 11.67/12.
- **Courses:** Object-Oriented Software Engineering, Data Structures, Algorithms, Database Management Systems, Real-Time Concurrent Systems.

Skills

Languages Python, Java, C, C++, JavaScript (Node.js, React), SQL, HTML

Platforms AWS, Linux (Ubuntu), Windows, Mac

Technologies Git, Scikit-learn, Tensorflow, React Native, EC2 instance, Eclipse, Visual Studio Code

Experience

Open Source Integration Developer

BLINDSIDE NETWORK INC.

Ottawa, ON

May. 2018 - Aug. 2018

- Installed and integrated BigBlueButton with Zimbra and OpenEdx to manage entire activities at one spot and improve online learning process.

Java Developer

ESPIAL GROUP INC.

Ottawa, ON

Sep. 2016 - Dec. 2016

- Collaborated in an Agile team; maintained and upgraded containerized applications; executed automated tests for app efficiency enhancement.

Additional experience as **Programmer** and **Teaching Assistant** at Carleton University.

Projects

Smart Snake

github.com/yunkaiwang/SmartSnake

Carleton U.

2018

- Established an AI technique to play simple board games and analyzed the limitation of the technique.
- Evolving neural network with genetic algorithm with randomly initialized parameters to serve as the initial population.

TFTP File Transfer System

github.com/yunkaiwang/TFTPFileTransferSystem

Carleton U.

2018

- A fully-functional file transfer system implemented based on the TFTP specification; implemented using Java.

Retrieve

github.com/Jasonjys/retrieve

Carleton U.

2017

- A lost-and-found mobile app developed using React Native and deployed in the iOS system.
- Created and applied chat functionality; implemented EC2 server for managing search and chat requests.

JESB, Jira to ElasticSearch Bridge

Espial

- Enabled automatic generation of team statistics and store these data in Elastic Search; implemented using Node.js.

Publications

2021 **Simple Linear Time Algorithms For Piercing Pairwise Intersecting Disks**, A. Biniaz, P. Bose, Y. Wang.

WADS

2018 **A Proposed Method for Designing Diagnostic Mathematics Tests**, K. Cheung, B. Stevens, Y. Wang.
