Company Recruitment Team

March 31, 2021

<COMPANY ADDRESS>

Job Application for <job title>

Dear <recruiter name/hiring manager>,

About Me

I am currently enrolled as a Master's student at Carleton. My anticipated graduation date is June 2021. I have an outstanding academic performance at school, both as an undergraduate student and a graduate student. I have received the Entrance Scholarship from Carleton in full amount, and I was awarded the Senate Medal when I finished my Bachelor's study. I have completed a total of four co-op work terms at three different companies with hands-on experience with many large-scale projects. I developed a keen interest in advanced data structures and algorithms, and I can effectively apply them in real applications for performance improvement. I am also skilled in object-oriented programming and deployment and development of web applications; I launched a lost-and-found mobile app using Express and React Native, and I have also integrated BigBlueButton with open source platforms like Zimbra and Open Edx. I am always passionate to learn cutting-edge technologies and apply them in projects and systems. I have refined my strengths in project management, technical troubleshooting, and problem resolution through my years of professional experience.

Why <company>?

Why Me?

With my wide-ranging technical skills, superior capacity to tackle time-sensitive projects, and proven ability to deliver best-in-class customer service, I am confident that I will exceed your expectations from my first day on the job.

Sincerely,

Yunkai Wang
